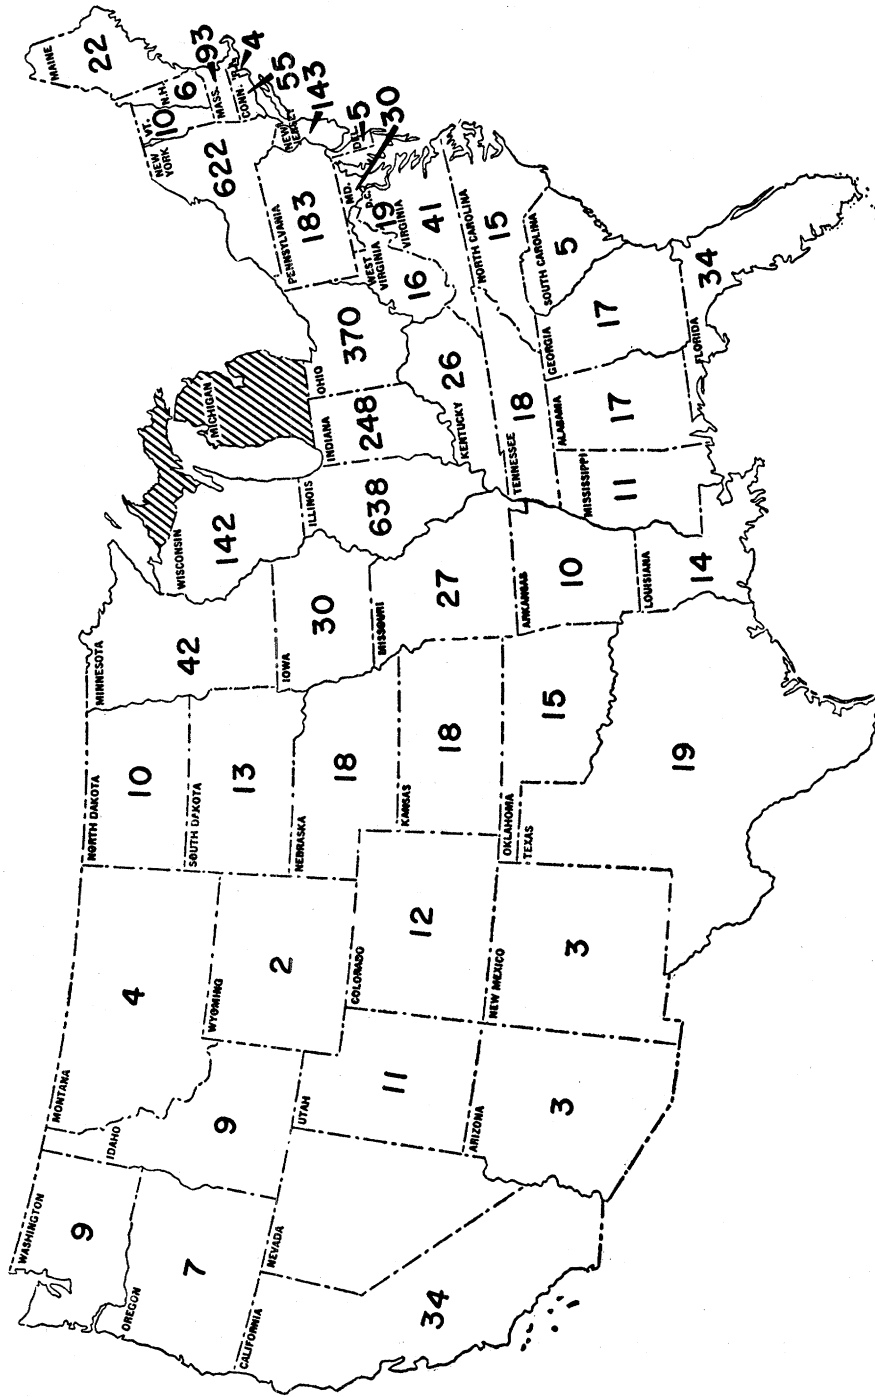

CHART IIg(2)  
Geographical Distribution of Out-of-State Students for the Year 1954-55.

NEW STUDENT ENROLLMENTS

This part of the Annual Report is concerned with the new students entering Michigan State during the year 1954-55. Charts IIIa, IIIb, and IIIc, and the accompanying tables, show the classification of new students as to when they entered, the type of admission, and their rank in high school. It should be noted that approximately 70 per cent of the students enrolled for the first time in any college are from the upper half of their high school class.

Chart IIId shows the distribution of new students by schools. It is interesting to note that the School of Business and Public Service attracts the largest number of new students.

## SURVIVAL OF STUDENTS

This part of the Annual Report has been added this year. These figures are incomplete at the present time, but it is hoped that more accurate and complete figures can be presented in future reports.

The figures shown here compare favorably with survival figures as reported by other institutions, but no definite conclusions should be made until a wider range of figures is obtained.

\*Figures are not available at this time to indicate the percentage of students graduating at the end of the fourth year, as compared to those who withdrew. The 14.6 percent who survived to begin the fifth calendar year includes those who did not complete undergraduate work in four years, as well as those who may have withdrawn and later returned to school.

## DEGREES AND CERTIFICATES GRANTED

As would be expected, the degrees granted at Michigan State during the first one hundred years shows the same trend as the student enrollments. 2935 degrees were granted in 1955. This is more than were granted in the first 60 years of the University's history.

More than half of the total degrees granted have been granted in the past seven years. Approximately 75 per cent of all advance degrees have been in the past 10 years.
